

Datasheet

Instruction

The 4-channel curtain module is designed for the control of AC curtain motors, blinds, and similar loads. It receives control commands via the KNX/EIB bus, enabling centralized automation. Each channel provides a switch output (Up/Down) and supports manual operation.

4-Channel Curtain Module

Key Features

- Supports both standard curtain mode and blind/shutter mode.
- Independently controls up to 4 AC curtain or blind motors.
- Long electrical/mechanical lifespan ensure stable operation.
- Designed for easy installation on standard 35mm DIN rails.
- Integration with scene and automatic control systems.

Parameters

- Model Number: SH-KAWB-CCM401
- Power Supply: DC 21V-30V
- Output: 4 Channels
- Output Rated Voltage: 250/440V AC (50/60Hz)
- Output Rated Current: 10A
- Connections: EIB/KNX
- Installation: 35mm DIN Rail Mounting
- Dimension: 72 x 90 x 64 mm
- Weight: 0.34kg
- Working Temperature: -5°C to +45°C
- Storage Temperature: -25°C to +55°C
- Working Humidity: <93%RH (non-condensing)
