# Datasheet

DNAKE CMS

Instruction

DNAKE CMS is mainly for local management. Users can manage many devices and residents in batches. Cards or face data can be added to devices so users can unlock with cards and face recognition. Call, unlock and alarm logs of devices can also be viewed by CMS. If users need daily report, they can configure schedule email to have the log report of devices.

Key Features

- Manage Devices and Residents locally
- Register cards and face registration
- Check Call, Unlock, and Alarm Logs
- Receive Schedule Send Logs by email
- Sending and receiving messages
