

# **DNAKE Cloud Platform Release Notes of Version 2.2.0**

## **1. Introduction**

In this update, we have comprehensively enhanced resident management and access control efficiency. New features include QR code registration that eliminates the need for indoor monitor, the ability to join different families, and personal PIN codes, along with batch creation and import for personnel.

This update also improves search, sorting, and data entry experiences, while boosting offline device verification capabilities and template file usability.

- Cloud Platform Version: 2.1.0 to 2.2.0
