# DNAKE Cloud Platform Release Notes of Version 2.3.0

## 1. Introduction

In this update, we have improved the work efficiency of property management and the security of access control management. The new features include support for the creation of multiple property managers accounts and permission configuration, as well as the configuration of emergency escape doors with one-click control for opening and closing.

This update also adjusts the way residents enter card numbers, and adds first-use guide for functions.

Cloud Platform Version: 2.2.0 to 2.3.0
