

# DNAME Cloud Platform Release Notes of Version 2.3.2

## 1. Introduction

In this update, we have upgraded partial cloud platform functions. The optimizations include support unified configuration of unlocking modes for Access Control, fire alarm scenario settings, and synchronization of Phonebook files to devices.

This update also extended the maximum editable length of Message content and added new event types reported by AC devices.

Cloud Platform Version: 2.3.1 to 2.3.2

## 2. Optimization

- Support unified configuration of unlocking modes for Access Control
- Extend the maximum editable length of Message content
- Extend the maximum length of email addresses

## 3. Bug Fixes.

- Fix some bugs
